

## Science

This week's learning is a little like the White Rose Maths we're using, watching a video, pausing when asked and completing some worksheets. I'd like you to complete these three activity sheets over the next two days. As it's after 19<sup>th</sup> June, we won't be emailing our worksheets in to live lessons.

Go to this video <https://www.youtube.com/watch?v=XAJUzs46nJQ>, then complete the first two worksheets as requested and the final one when you have watched the whole video. Remember you're doing this over two days so you decide how much you do on each day.
