

## Rockets!

We are currently learning all about space. This week we have been thinking about counting in 10s up to 100.

Can you design a rocket? You must write a multiple of 10 on your rocket, e.g. 50. Draw your rocket and write your chosen number carefully. There is an example below.

I have also attached number cards for you to use at home to support your learning. Practise counting in 10s with your grown-up at home.

Thank you for your continued hard work at home.

Mrs Sanford
