7.1.19

3,6 Times Tables

Hint 1: 6 times tables are just the 3 times tables doubled!

So if you are not sure what $6 \times 4 =$ just do 3×4 then double it!

Hint 2: Remember division is the inverse (opposite) to multiplication.

When you are dividing, just count up in 3's or 6's until you get to the largest number e.g. $18 \div 3 =$ (count up in 3's until you reach 18 and that's the answer 😊)

$3 \times 10 =$

$6 \times 7 =$

$9 \div 3 =$

$54 \div 6 =$

$3 \times 8 =$

$6 \times 5 =$

$15 \div 3 =$

$27 \div 3 =$

$3 \times 9 =$

$6 \times 2 =$

$24 \div 3 =$

$48 \div 6 =$

$3 \times 7 =$

$6 \times 12 =$

$66 \div 6 =$

$33 \div 3 =$

$3 \times 5 =$

$6 \times 10 =$

$72 \div 6 =$

$24 \div 6 =$

$3 \times 11 =$

$6 \times 4 =$

$6 \div 3 =$

$6 \div 6 =$
