

28th January

Complete the following questions. For questions 1-5, please re-draw the triangles in your homework book as best as you can.

Remember:

- Equilateral Triangle → 3 equal sides, 3 equal angles
- Isosceles Triangle → 2 equal sides, 2 equal angles
- Scalene Triangle → no equal sides, no equal angles
- Right Angle Triangle → one angle is a right angle (90°)

Look for clues

Draw a line to match each description to a triangle.

- 1 A scalene triangle with one obtuse angle
- 2 An isosceles triangle with three acute angles
- 3 An equilateral triangle
- 4 A right-angled triangle
- 5 An isosceles triangle with one obtuse angle

Order, order

Write these measurements in order, smallest first.

- 6 1270 g 1.6 kg 350 g 2500 g 1.25 kg

- 7 3000 ml 2.6 litres 1400 ml 0.8 litres 1.75 litres

- 8 16 km 5 miles 10 km 15 miles 24 km

Remember that
5 miles is
approximately
8 kilometres.

1 mile = 1.6 kilometres
