

Year 6 Homework – Due on Friday the 7th of February 2020.

Sculpture is a visual art. It involves the creation of artistic objects in three dimensions—length, width, and height. The main feature of a sculpture's design is the way its forms extend through space, they can be large or small. A sculpture may look exactly like a person or object or may reflect shapes and forms.

1. Your task is to create a sculpture using natural objects. Evaluate your project by explaining your process and identifying ways of improving your work.
2. Research the work of a sculptor whose art you like. Describe and discuss your response to their work or compare the work of two different sculptors!

You may choose one from the pictures below.
