

Maths

Just like for English here's a short Maths quiz for you to have a go at in your home learning books! I'll let you have the answers tomorrow so you can see how you did - Good luck!

1. Amir has £2.40 in 10p coins.
How many coins does he have?

2. $653 + 156 =$
You could use the expanded column method

3. $93 \times 4 =$ You could use the multiplication grid below

x	90	3
4		

4. Double 13 You could use the diamond shape for this

5. Halve 58 You could use the diamond shape for this

6. How many minutes make one and a half hours?

7. Count of 7 litres from 312 litres

8. A rock face is 240m high. Cathy has climbed 127m. How far does she still have to climb?

You could use your number line for this and then get the frog to jump on (remember he loves multiples of 10 - numbers ending in a zero)
