

Maths

Today, we will be looking at fractions of amounts.

Remember the famous - 'divide by the bottom, then times by the top!'

Here's an example:

$$\frac{3}{10} \text{ of } 40 = 12$$

Divide by the bottom, so how many lots of 10 go into 40. Answer 4

Then times by the top, so $4 \times 3 = 12$

Here's another way of doing it:

Number of hoops interested in $\frac{3}{10}$ of 40 = 12
 Divide between hoops

Your task today - In your home learning book, copy and complete the calculations below:

Solve the following:

1. $\frac{3}{4}$ of 20 =

6. $\frac{3}{4}$ of 28 =

2. $\frac{2}{3}$ of 18 =

7. $\frac{2}{3}$ of 27 =

3. $\frac{3}{5}$ of 45 =

8. $\frac{4}{5}$ of 35 =

4. $\frac{3}{8}$ of 24 =

9. $\frac{5}{8}$ of 32 =

5. $\frac{6}{10}$ of 70 =

10. $\frac{3}{10}$ of 50 =
