

Science

Today, I'd like you finish our investigation into friction by writing up the results table and the conclusion.

Copy the results table below into your home learning book under the sub-heading - **Results**

Material	Distance (cm)
Smooth plastic	57
Sandpaper	34
Carpet	28
Towel	24

Now, using both your prediction and the results table write up your conclusion under the sub-heading - **Conclusion**

Did the results support your prediction - why or why not?
