

## Science

Click on this link <http://ve34.lgfl.org.uk/> which takes you to the Virtual experiments page for years 3 & 4 on the LGFL website, then click on 3E magnets. Then, click on and look over the key words, listen to the introduction and complete activity 1 (Which of these icons is magnetic); then complete the activity (including clicking on the question mark and answering that question and looking at the way the results are displayed - the chart tab).

Challenge - complete the extension task (again, including clicking on the question mark and answering that question and looking at the way the results are displayed - the chart tab).
